

A GLIMPSE OF OUR STORY

Club Car earned a good reputation by its tough build golf carts made since 1960's. Whilst other golf carts are built on steel frames that can corrode, Club Car carts featured the industry's only rustproof, corrosion-resistant aluminium frame engineered to resist impact better than steel frames.

From golf courses, now Club Car carts are widely used in different areas of business or personal. Ranging from hospitality, education, sport, security, health industry, manufacturing facility to personal used, Club Car products will take good care of your needs efficiently and environmental friendly.

In Indonesia, Club Car appointed PT. Mobilindo Nusa Persada (MNP), a legal entity in Indonesia, as the sole authorized distributor for all Club Car products.

ABOUT OUR BUSINESS
